Great Tips for Gorgeous Eyes!

Deep-Set Eyes

Eyes that are set deep, making the browbone appear more noticeable.

- 1** First, apply the highlighter shade to the eyelid and along the inner corner of the lower lashes and to brow bone.
- 2** Next, apply the midtone shade up above the crease and sweep it across the brow bone.
- 3** To finish, apply the accent shade to the outer corner of the upper lashline, then up onto the corner of the brow bone. Sweep the accent shade underneath the lower lashline for definition.

Highlighter – The lightest shade used in an eye look. It enhances eye features such as the brow bone and inner corner of the eye.

Midtone – The medium shade used in an eye look. For a day look, this shade is usually neutral.

Accent – The darkest shade used in an eye look. It adds a pop of color and depth to the eye.
